

CORE organic

CORE Organic and TPorganics

Ideas for a cooperation

Differences between CORE Organic and TPorganics

CORE Organic

- main aim: research funding
- members are national authorities, ministries, funding bodies ...
- Basically policy driven

TPorganics

- main aim: build a stakeholder forum to identify research needs
- members are industry, associations, civil societies...
- Basically industry driven

Synergies between CORE Organic and TPorganics

- Identification of research priorities needs stakeholder input
- Aim in common is to strengthen “organic research”
- Lobbying towards the commission to include topics in the work programmes

Ideas for collaboration

- TP's and ERA-Net often strictly linked, COM also ask for it
- Collaboration could make both initiatives stronger
- Both structures remain independent but start information exchange
- TP Organics could become important instrument of stakeholder involvement
- Official support for the TP towards the EU
- Common seminars/events – eg. autumn 2009 common seminar in Brussels to discuss results of strategic research agenda
